

Odyssey Headphone

Model OH-1V

CALIFONE® INTERNATIONAL LLC. | THE SOUNDS OF EDUCATION | 800-722-0500 | CALIFONE.COM

The Odyssey headphone is one of the most reliable and durable headphones designed for learning in K-12 classes

Its durability & flexibility make it ideal for any type of differentiated or small group learning experiences, in class, for library uses, and in computer labs.

This Odyssey mono headphone is remarkably quiet and comfortable because of its extra deep (noise cancelling) earcup cavities and the flexible comfort sling, which contours to the user's head for better weight distribution and balance. Volume control is on the back of the right earcup.

The replaceable 6' cord withstands 250,000 flexes, and with a cord change, enables the same headphone to operate instead in stereo mode (OH-4V) for added flexibility. This also allows minor repairs to be made without purchasing a new headset body.

The audio playback is calibrated to enhance the tonal range of the human voice, which is critical in language learning.

Compatible with Chromebooks, iPads, iPhones, Galaxy, Surface, laptops, desktops, & MACS. [Click to read more.](#)

3-Year Commercial Warranty

Covers use in schools, which is considered to be a commercial / industrial application. Warranties on headphones made for consumer uses are voided when used in schools. [Click to read more.](#)

Features

1. Rugged ABS headstrap & earcups resist breakage with recessed wiring for safety
2. Fully adjustable headband & comfort sling fits all sizes
3. Noise-reducing circumaural earcups lower external noise so volume needn't as high, for hearing safety
4. Reinforced entry point of the cord into the earcup
5. Replaceable 6' straight cord, with 3.5mm mono plug
6. Replaceable hypo-allergenic (no latex) ear cushions
7. One of the industry's deepest ear cavities provides for added comfort

Specifications

Impedance	300 Ohms each side, +/- 15%
Frequency Response	20 - 20K Hz
Sensitivity	111dB ± 3dB at 1kHz
