OF EDUCATION

# PresentationPro™ Speaker with Mounting Bracket

## Model PA310W

School audio equipment needs to be rugged and versatile, whether it's used inside or outdoors, hooked up to a tablet, smartphone, computer, projector, or needed for straight forward voice amplification.

The variations are endless and the flexibility built into the PresentationPro makes this PA workhorse a good investment. It's built for fast and easy installations so you don't need an engineering degree in order to turn it on and start the presentation.

With an increasing number of schools installing projectors and interactive whiteboards into classrooms on a district wide basis, the need has never been clearer to complement these systems with a high-quality speaker that engages students. And with students being involved in so many technology-based activities throughout the year, including Skype sessions Google+ Hangouts and Facetime, creating videos, podcasting, or simply replaying content from a mobile device, having a good speaker in the classroom is essential.

The PresentationPro provides educators with high-quality audio support, while seamlessly connecting to LCD projectors, interactive whiteboards, multimedia players and computers for enhanced visual and audio learning.

The PresentationPro is powerful enough so a single speaker can be used in each classroom, minimizing installation time and costs.

It can be used in classrooms, labs, meeting rooms, cafeterias, auditoriums, conference rooms & hotels.

The PA310W kit includes the PresentationPro (PA310) and the MB-PA3W mounting bracket.

Included PI-RC  
Infrared volume /  
mute remote  
magnetically  
attaches to the  
top of the  
speaker to prevent  
it from becoming  
lost

Top of tripod and bracket  
mounts directly into the  
underside of the  
PresentationPro

Sturdy three-point connection between the  
bracket and the PresentationPro for stability.  
Vertical and horizontal directionality on bracket  
enables optimal adjustment for ideal projection.
